Overview:

Sageworks is a leading financial software and data analysis firm located in Raleigh, North Carolina. We build web-based technologies to help financial institutions make better decisions in advising and private lending—in fact, thousands of accounting firms and financial institutions use Sageworks’s software and industry data in their daily operations. Inc. Magazine and Deloitte have recognized us as one of the fastest-growing technology companies in the United States.

Position Overview:

The Junior Bank Consultant Intern will work directly with our quantitative analyst to develop a new product that will help financial institutions make smarter lending decisions. Specifically, candidates will travel frequently to financial institutions within our client network across the country to identify and gather data relevant to developing the product. Moreover, candidates will have the opportunity to speak with lending officers about the analysis and intuition behind private lending decisions. Finally, candidates will help shape the product’s development throughout the course of the internship.

This is a unique opportunity for those interested in learning about private lending decision-making, financial statement analysis, product development, and financial modeling before graduation. We give our interns high levels of responsibility, hands-on experience, and the ability to make an impact from the outset.

Qualifications:

Candidates should have an undergraduate GPA of at least 3.7 and have demonstrated leadership skills through extracurricular involvement or in previous internships. Candidates should be interested in financial modeling and product development; note that candidates do not need to have prior experience in financial modeling or product development. Individuals must, however, be self-driven, detailed-oriented, and be able to work independently. Finally, candidates will be working in a fast-paced, deadline driven environment, so they must be goal-oriented.

Compensation & Benefits:

We are offering competitive pay for this internship.

To Apply:

Applicants should email their resumes to Michael Zhang at michael.zhang@sageworksinc.com by March 7th.
