Two Tenure Track positions in the Department of Agricultural and Resource Economics at the University of Connecticut

The Department of Agricultural and Resource Economics at the University of Connecticut is pleased to announce two tenure-track faculty positions: one in environmental and natural resource economics and one in microeconomics and health. These positions reflect the University of Connecticut’s commitment to cluster hiring, designed to develop or enhance nationally-recognized strengths and will allow for collaborative, multi-disciplinary research across the University. Interviews for these positions will be conducted at the San Diego ASSA meetings.

Both are nine-month positions with research (50%) and teaching (50%) beginning August 2013.

POSITION 1: Assistant/Associate Professor in Applied Microeconomics and Health (Search #2013175)

Responsibilities: develop an internationally-recognized research and teaching program in applied microeconomics, experimental, or behavioral economics within the cluster of Food, Nutrition, and Health in the areas of food, health, and related policy issues, seek grant funding, and participate in collaborative research.

Required qualifications: Ph.D. in Economics, Agricultural Economics or related field by time of appointment, excellent training in econometrics, microeconomics, or quantitative methods, and superior written and oral communication skills. Preferred qualifications: Potential for or demonstrated teaching excellence, potential or demonstrated ability to attract extramural funding, potential for or record of publications in high quality refereed journals, and coursework or research experience in food, health, or related policy issues.

POSITION 2: Assistant/Associate Professor, Environmental and Natural Resource Economics (Search # 2013176)

Responsibilities: develop internationally-recognized research program in environmental and natural resource economics (ENRE) within the Environmental Sustainability cluster, related to water resource use/development within one or more areas: climate change/adaptation, coastal/marine resources, watershed management, urbanization, land use, and related
economic/policy issues; teach and advise graduate/undergraduate students; seek grant funding; participate in collaborative research including, at the Associate level, multidisciplinary initiatives.

Required qualifications: Ph.D. in Economics, Resource or Environmental Economics, or related field by time of appointment, excellent training in microeconomic theory and application, quantitative methods, and ENRE, and superior communication skills. Preferred qualifications: experience and success in teaching, research, and grantsmanship, ability to publish in high quality refereed journals, and advanced training in experimental methods, econometrics, or dynamic analysis.

Apply online through Husky Hire at http://www.jobs.uconn.edu/. Submission must include a letter of application, curriculum vita, graduate transcripts (unofficial copies accepted), publications samples and/or dissertation abstract. Arrange for three letters of reference to be sent to AREsearch@uconn.edu; enter search number in the subject line. Apply by November 15, 2012 for full consideration. Interviews will be conducted at the San Diego ASSA meetings. For more information visit http://www.are.uconn.edu.
