The Union of Concerned Scientists has two, two-year post-doctoral Kendall Fellowships available. Thanks in advance for distributing to your colleagues and students.

**Kendall Fellowship: Electric Vehicles and Solar Photovoltaics**

**Energy and Clean Vehicles Programs**  
**Location:** Cambridge, MA (preferred) or Washington, DC Office  

The Union of Concerned Scientists (UCS), the leading science-based organization at the center of today’s most exciting and important policy debates, seeks outstanding candidates for the Kendall Science Fellows program. This up to two-year fellowship is open to candidates who will have completed their Ph.D. before spring 2015. The fellow will work with UCS staff to develop policy recommendations based on the findings and will present this work to media, policymakers, and the public and share findings at technical meetings. Candidates must have a strong background in electric power systems or electric vehicles, and excellent written and oral communication skills.

**Kendall Fellowship: Environmental Justice and Climate Policy**

**Center for Science and Democracy and Climate and Energy Program**  
**Cambridge, MA (preferred) or Washington, DC Office**  

The Union of Concerned Scientists (UCS), the leading science-based organization at the center of today’s most exciting and important policy debates, seeks outstanding candidates for the Kendall Science Fellows program. This up to two-year fellowship is open to candidates who will have completed their Ph.D. by spring 2015. The fellow will work with staff in both the Center for Science and Democracy and the Climate and Energy Program at UCS, and with external partners from environmental justice (EJ) organizations, to study costs and benefits of emissions reduction strategies to combat climate change. The fellow will contribute to formulating research questions, investigating, presenting, and making policy and other recommendations to strengthen connections and bridge gaps between the mainstream environmental movement and environmental justice movement. This fellowship will also have an impact on UCS’s broader environmental justice and equity priorities.
